

Hello!

The attached .pcapng file contains a monitor mode capture of two people playing Super Mario Maker 2 in local wireless multiplayer mode ("Nearby Play").

Can you figure out which level we were playing?

Hints:

- The flag can be found in the description of the level file.
- The level file is transmitted using the "stream broadcast reliable protocol" with stream id 1. Stream id 2 is used for the thumbnail.
- All relevant encryption keys can be found online.
- No reverse engineering is required – this challenge can be solved from public documentation.
